

Prototype Sprint 2

Featuring Expansion & Integration

Module 11

Bridge Recall: Security to Performance.

1. Define “Bottleneck”

What does this term mean in the context of system performance and data flow?

2. Previous Fix & Metrics

Name the fix your team applied last time and specifically what metric it improved (e.g., time, gas, memory).

3. Scaling Strategy

Which would scale better for 10x users-caching or vertical scaling? Why?

Planning Framework

Instructions

1. Select Features

Choose one new feature and one integration.

- AI: Translation, summarization API
- Blockchain: History, access control

2. Sketch the Flow

Draw a simple diagram

Input --> Process --> Output

3. Fill the Table

Complete the planning table on the right with your team.

Sprint 2 Plan Table

ITEM CATEGORY	DESCRIPTION & DETAILS
New Feature What will you add?	<i>Example: Add a "Save to Favorites" button for generated images...</i>
Integration API/Tool/Service	<i>Example: OpenWeatherMap API to get local conditions</i>
Success Criteria How do we know it works?	<i>Example: Clicking button saves item to local storage and appears in "Favorites" tab....</i>
Risks & Fixes Potential issues?	<i>Example: API limit exceeded Cache responses locally for 1 hour...</i>

Verification: Before vs After Table

TEST CASE/SCENARIO	BEFORE STATE	AFTER STATE	IMPROVEMENT TYPE
Chatbot Q&A	English responses only	Adds Filipino translation	EXPANDED FEATURE
Contract Storage	Only stores 1 message	Stores history of 3 messages	EXPANDED INTEGRATION
<i>Your Test Case...</i>	<i>Current limitation.</i>	<i>New capability...</i>	<i>TO BE DETERMINED</i>
